2012

TIDERACE

INTRODUCTION:

2011 has been a momentous year for Tiderace. Our association with Cobra International, Thailand has given us the ability to expand both our model range and production capacity to service the increasing demand for our products. We pride ourselves in developing cutting edge sea kayak designs manufactured to the highest quality using the finest and most advanced materials and construction techniques. This places Tiderace sea kayaks at the forefront of global sea kayak production.

2012 DEVELOPMENTS INCLUDE:

- New Models:

Xplore_M completes the size range on our proven expedition kayak – now there really is a size to suit everyone's aspirations. Subtle changes to the hull shape give this model a higher cruising speed.

Xtra – brings the fun in close to shore. (see main product description)

- New Constructions. A new year, a new round of refinements in our kayak constructions. More strategic reinforcing, new developments in Tiderace Core Technologies, new moulding techniques and a commitment to using the strongest and highest specification resins and laminates available.
- New Visual Designs. New for 2012, Tiderace introduce a stunning new graphic layout to its top range constructions. A combination of innovative technique combined with pure craftsmanship - never seen before in the sea kayak world. This artwork creates a stunning visual appeal – a new signature for Tiderace which will undoubtedly set our boats apart from the rest.
- New Graphics. Kayak model logos redesigned for 2012 – these new graphics complete the new visual design.

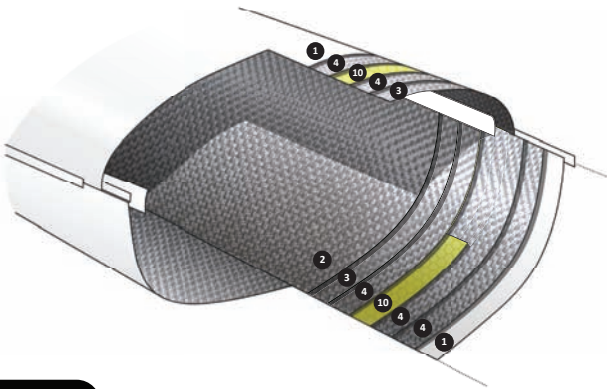

TCT CONSTRUCTION

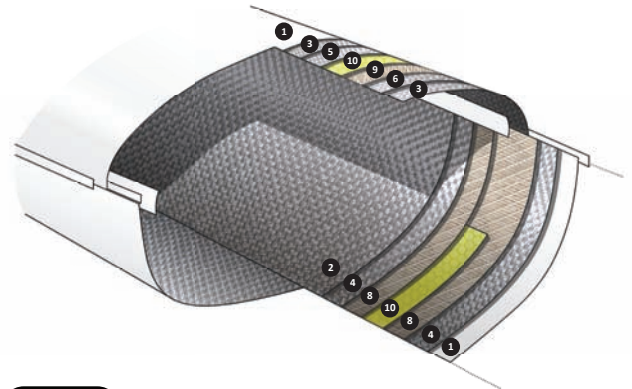

Our kayaks feature Tiderace Core Technology – a multi-layer laminate with an additional resin supported core that’s designed to take abuse in rock gardens, big surf and expedition use. Performance laminates that give significantly stronger, stiffer and lighter kayaks, far exceeding the typical industry standard.

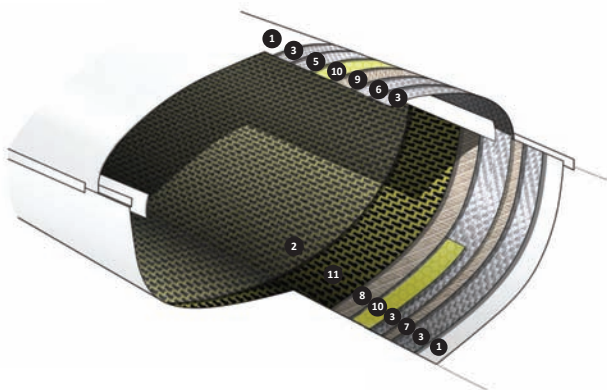

CLASSIC
Wet Laminate deck and hull

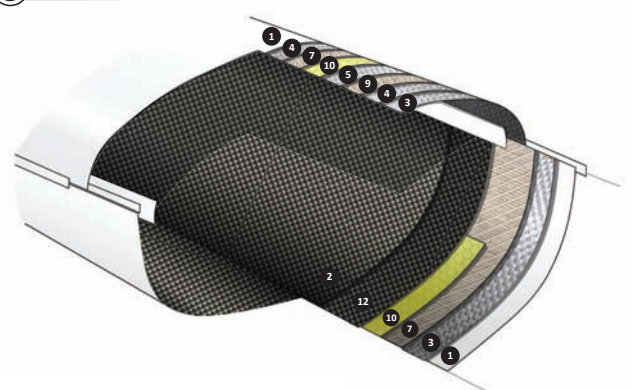

G-CORE
Wet Laminate deck, Vacuum hull

HARDCORE
Vacuum deck and hull

CARBON-PRO
Vacuum deck, infused hull

- 1 Gel Coat
- 2 Glass cloth s-lite
- 3 Glass cloth lite
- 4 Glass cloth medium
- 5 Glass cloth heavy
- 6 Glass cloth s-heavy
- 7 Glass biaxial lite
- 8 Glass biaxial medium
- 9 Glass biaxial heavy
- 10 Soric SF2 core
- 11 Carbon Kevlar cloth
- 12 Carbon cloth

All constructions use a specially formulated epoxy resin which is stronger and tougher than polyester or vinylester resin.

Epoxy compatible polyester gelcoat for easy field repair.

All constructions are post, heat-cured.

Bonded “biscuit tin” side seam with additional inside and outside tape seams.

XCITE

THE WORLD'S FINEST ROUGH WATER, TOURING SEA KAYAK

Xcite is a touring sea kayak with high manoeuvrability, stability, comfort and seaworthiness. The boat's composure in rough water is legendary - it give paddlers a feeling of security and invincibility that is rarely found in other designs.
